

getNum()

Retrieves a Float value from the TableRow's specified column. The column may be specified by either its ID or title.

Examples

```
// Given the CSV file "mammals.csv" in the project's "assets" folder:
//
// id,species,name
// 0,Capra hircus,Goat
// 1,Panthera pardus,Leopard
// 2,Equus zebra,Zebra

let table;

function preload() {
  //my table is comma separated value "csv"
  //and has a header specifying the columns labels
  table = loadTable('/assets/mammals.csv', 'csv', 'header');
}

function setup() {
  let rows = table.getRows();
  let minId = Infinity;
  let maxId = -Infinity;
  for (let r = 0; r < rows.length; r++) {
    let id = rows[r].getNum('id');
    minId = min(minId, id);
    maxId = max(maxId, id);
  }
  print('minimum id = ' + minId + ', maximum id = ' + maxId);
  describe('no image displayed');
}
```

Syntax

`getNum(column)`

Parameters

column String|Integer: columnName (string) or ID (number)

Returns

Number: Floating point number
