

hide()

Hides the current element.

Examples

```
let p;

function setup() {
  createCanvas(100, 100);

  background(200);

  // Create a paragraph element.
  p = createP('p5*js');
  p.position(10, 10);

  describe('The text "p5*js" at the center of a gray square.
  The text disappears when the user double-clicks the square.');
}

// Hide the paragraph when the user double-clicks.
function doubleClicked() {
  p.hide();
}
```
