

doubleClicked()

Calls a function when the mouse is pressed twice over the element.

Calling `myElement.doubleClicked(false)` disables the function.

Examples

```

function setup() {
  // Create a canvas element and
  // assign it to cnv.
  let cnv = createCanvas(100, 100);

  background(200);

  // Call randomColor() when the
  // canvas is double-clicked.
  cnv.doubleClicked(randomColor);

  describe('A gray square changes color when the user double-clicks the canvas.');
}

// Paint the background either
// red, yellow, blue, or green.
function randomColor() {
  let c = random(['red', 'yellow', 'blue', 'green']);
  background(c);
}

```

Syntax

```
doubleClicked(fxn)
```

Parameters

`fxn` Function|Boolean: function to call when the mouse is double clicked over the element.
`false` disables the function.
