

mouseClicked()

Calls a function when the mouse is pressed and released over the element.

Calling `myElement.mouseReleased(false)` disables the function.

Note: Some mobile browsers may also trigger this event when the element receives a quick tap.

Examples

▶
■

Copy
Reset

```

function setup() {
  // Create a canvas element and
  // assign it to cnv.
  let cnv = createCanvas(100, 100);

  background(200);

  // Call randomColor() when a
  // mouse press ends.
  cnv.mouseClicked(randomColor);

  describe('A gray square changes color when the user releases
  a mouse press.');
}

// Paint the background either
// red, yellow, blue, or green.
function randomColor() {
  let c = random(['red', 'yellow', 'blue', 'green']);
  background(c);
}

```

Syntax

```
mouseClicked(fxn)
```

Parameters

`fxn` Function|Boolean: function to call when the mouse is pressed and released over the element.
`false` disables the function.
