

# dragOver()

Calls a function when a file is dragged over the element.

Calling `myElement.dragOver(false)` disables the function.

## Examples

▶
■

```
// Drag a file over the canvas to test.

function setup() {
  // Create a canvas element and
  // assign it to cnv.
  let cnv = createCanvas(100, 100);

  background(200);

  // Call helloFile() when a
  // file is dragged over
  // the canvas.
  cnv.dragOver(helloFile);

  describe('A gray square. The text "hello, file" appears when
  a file is dragged over the square.');
}

function helloFile() {
  text('hello, file', 50, 50);
}
```

□
⟳

## Syntax

```
dragOver(fxn)
```

## Parameters

`fxn` Function|Boolean: function to call when the file is dragged over the element. `false` disables the function.
