Reference > textLeading()

textLeading()

Sets the spacing between lines of text when text() is called.

Note: Spacing is measured in pixels.

Calling `textLeading()` without an argument returns the current spacing.

Examples

```
function setup() {
  createCanvas(100, 100);

  background(200);

  // "\n" starts a new line of text.
  let lines = 'one\ntwo';

  // Left.
  text(lines, 10, 25);

  // Right.
  textLeading(30);
  text(lines, 70, 25);

  describe('The words "one" and "two" written on separate
lines twice. The words on the left have less vertical spacing
than the words on the right.');
}
```

Syntax

```
textLeading(leading)
```

```
textLeading()
```

Parameters

leading   Number: spacing between lines of text in units of pixels.
