Reference > connect()

connect()

Sends the element's audio to an output.

The parameter, `audioNode`, can be an `AudioNode` or an object from the `p5.sound` library.

If no element is provided, as in `myElement.connect()`, the element connects to the main output. All connections are removed by the `.disconnect()` method.

Note: This method is meant to be used with the p5.sound.js addon library.

Syntax

```
connect(audioNode)
```

Parameters

audioNode   AudioNode|Object: AudioNode from the Web Audio API, or an object from the p5.sound library
